DETAILED ACTION

Response to Amendment

1. In view of Applicant's amended claims, previous rejections under 35 U.S.C. 112 2nd paragraph are rendered moot.

Allowable Subject Matter

2. Claims 1-3 and 6-16 are allowed over the Prior Art of record.
3. The following is an examiner's statement of reasons for allowance: The primary reasons for allowance of independent claim 1 is the inclusion of the limitations of an apparatus and/or method for/of inspecting the inside of an underground pipeline, including radar (i.e. electromagnetic radiation) wherein a self-propelled vehicle having all of the recited elements, specifically including ***an antenna rotation mechanism for rotating an antenna for the radar along the inner peripheral surface of the underground pipe and capable of changing position of the antenna so that the antenna follows the inner peripheral surface*** (emphasis added).
None of the Prior Art indicates such a mechanism regarding an antenna, for radar or other types of electromagnetic radiation emitters/collectors/receivers/transceivers. A typical example of the Prior Art is shown below (Fig. 1 of US 3,964,171 to Gambini et al.) which indicates a flexing/spring mechanism to press followers against the wall, however, no teachings of any types of rotation mechanisms and/or radar.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
